Description / Comments

A clean classic style model with features inspired by the Italian icon Fiat 500. The project successfully combines luxury, efficiency, style and comfort. The natural curved lines and the absence of straight lines offer a dynamic movement and a unique character to design. Combined thus the beauty of navigation with the convenience of driving by road.

The design combined with the Perla color gives you different shades of sun contact, the windscreen set in a stainless steel frame gives you elegance and solidity. The front and rear lights create a light game as well as an incredible night lighting. The cornamusas attached to the platforms complete the lines of this ship. Each piece of the Sky interior, from the Waterjet stainless steel seats and from the steering wheel to the speakers and switches, is specially designed and handmade with attention to detail. The details of the dashboard, the onboard intermittents offer a functional and comfortable driving room. The rail and teak floor create a perfect chromatic combination, on which two fully crafted Chaise-longues stand out.
